

# CUSTOMIZED SUPPLY SOLUTIONS

## Tools and Service Options

ST Solutions offers a variety of service options, allowing you to choose the right services for your needs. All our solutions are integrated in our system to provide unified reporting and consolidated billing. We bring these solutions to our customers with smooth transitions, using proven implementation techniques.

## Kanban and Point of Use Inventory Systems

- A simplified inventory management system in single or multiple locations
- Places inventory close to the end user
- All items are barcoded for scanned ordering
- Establishes a bin location system
- Customized catalog showing availability by location
- Cost effective
- Usage information is available by your department, cell or cost center

## Spot Buy Management

- Available for all commodities
- Offers a single point of contact
- On-line requisition system that tracks all stages of the order, from quote approval, order generation, and fulfillment
- Usage information and billing available by your department, cell or cost center and the employee level

## Application Engineering

We create and document cost savings opportunities.

We introduce and coordinate vendors.

We improve production processes.

We enhance productivity through application improvements.
